

Our vision for Geography at The Henry Moore School

Intent

- To develop our learners' knowledge of places around the world and locally
- To develop independent thinkers who can use geographical language to describe a location
- To inspire our learners' curiosity about where they live
- To encourage our learners to examine, compare and review sources of geographical information
- To allow our learners' to make comparisons between different locations
- To develop ambitions in our learners to work with the natural world
- To help our learners to understand what impact human beings have on our planet

Implementation

- Our learners will be provided with a range of geographically accurate sources to explore
- Our learners will be given time to explore, question and discuss up to date sources of information, including maps, globes and atlases
- Our learners will have regular opportunities to use geographical vocabulary
- Our learners will have the opportunity to visit local places and experience practical fieldwork activities
- Our learners will be provided with memorable activities to engage with
- Our learners will be taught through progressive blocks of lessons that allow them to make links between physical and human geography

Impact

- Our learners will think geographically and be able to discuss places using geographical terminology
- Our learners will have a secure understanding of their local geography
- Our learners will be able to identify physical and human geographical features
- Our learners will recognise the impact human beings are having on our planet and discuss ways to conserve it for future generations
